# CJIS SECURITY AWARENESS TRAINING

## 5.2 Policy Area 2: Security Awareness Training

Security training is key to the human element of information security. All users with authorized access to CJJ should be made aware of their individual responsibilities and expected behavior when accessing CJJ and the systems which process CJJ. LASOs require enhanced training on the specific duties and responsibilities of those positions and the impact those positions have on the overall security of information systems.

### 5.2.1 Basic Security Awareness Training

Basic security awareness training shall be required within six months of initial assignment, and biennially thereafter, for all personnel who have access to CJJ to include all personnel who have unescorted access to a physically secure location. The CSO/SIB Chief may accept the documentation of the completion of security awareness training from another agency. Accepting such documentation from another agency means that the accepting agency assumes the risk that the training may not meet a particular requirement or process required by federal, state, or local laws.

A significant number of topics can be mentioned and briefly discussed in any awareness session or campaign. To help further the development and implementation of individual agency security awareness training programs the following baseline guidance is provided.

#### 5.2.1.1 Level One Security Awareness Training

At a minimum, the following topics shall be addressed as baseline security awareness training for all personnel who have unescorted access to a physically secure location:

1. Individual responsibilities and expected behavior with regard to being in the vicinity of CJJ usage and/or terminals.
2. Implications of noncompliance.
3. Incident response (Identify points of contact and individual actions).
4. Visitor control and physical access to spaces—discuss applicable physical security policy and procedures, e.g., challenge strangers, report unusual activity, etc.

#### 5.2.1.2 Level Two Security Awareness Training

In addition to 5.2.1.1 above, the following topics, at a minimum, shall be addressed as baseline security awareness training for all authorized personnel with access to CJJ:

1. Media protection.
2. Protect information subject to confidentiality concerns — hardcopy through destruction.
3. Proper handling and marking of CJJ.
4. Threats, vulnerabilities, and risks associated with handling of CJJ.
5. Social engineering.
6. Dissemination and destruction.

### 5.2.1.3 Level Three Security Awareness Training

In addition to 5.2.1.1 and 5.2.1.2 above, the following topics, at a minimum, shall be addressed as baseline security awareness training for all authorized personnel with both physical and logical access to CJJ:

1. Rules that describe responsibilities and expected behavior with regard to information system usage.
2. Password usage and management—including creation, frequency of changes, and protection.
3. Protection from viruses, worms, Trojan horses, and other malicious code.
4. Unknown e-mail/attachments.
5. Web usage—allowed versus prohibited; monitoring of user activity.
6. Spam.
7. Physical Security—increases in risks to systems and data.
8. Handheld device security issues—address both physical and wireless security issues.
9. Use of encryption and the transmission of sensitive/confidential information over the Internet—address agency policy, procedures, and technical contact for assistance.
10. Laptop security—address both physical and information security issues.
11. Personally owned equipment and software—state whether allowed or not (e.g., copyrights).
12. Access control issues—address least privilege and separation of duties.
13. Individual accountability—explain what this means in the agency.
14. Use of acknowledgement statements—passwords, access to systems and data, personal use and gain.
15. Desktop security—discuss use of screensavers, restricting visitors' view of information on screen (mitigating "shoulder surfing"), battery backup devices, allowed access to systems.
16. Protect information subject to confidentiality concerns—in systems, archived, on backup media, and until destroyed.
17. Threats, vulnerabilities, and risks associated with accessing CJIS Service systems and services.

### 5.2.1.4 Level Four Security Awareness Training

In addition to 5.2.1.1, 5.2.1.2, and 5.1.2.3 above, the following topics at a minimum shall be addressed as baseline security awareness training for all Information Technology personnel (system administrators, security administrators, network administrators, etc.):

1. Protection from viruses, worms, Trojan horses, and other malicious code—scanning, updating definitions.
2. Data backup and storage—centralized or decentralized approach.

# What Every User Must Know

## STATE OF UTAH BUREAU OF CRIMINAL IDENTIFICATION

### 5.6 What every User must know

#### Dissemination

- Never discuss information received from any UCJIS file with someone outside of the criminal justice industry
- Even if someone does not have a criminal history and that information is passed to someone outside of the criminal justice industry, that is dissemination and should not be done.

#### Privacy

- Never, never look up a person in any file in UCJIS for curiosity sake (family, neighbors, ex-family, soon-to-be-family, fellow employees, people you are mad at, people you want to irritate, etc.)
- Never discuss the information you see or print from UCJIS outside of your agency.
- If you misuse the information found in UCJIS, you could be charged with a Class B Misdemeanor.
- If you have visitors at your desk, cover up all information printed from UCJIS and lock your monitor.

#### Security

- Lock your keyboard (the window key and "L", or Ctrl Alt Del) when you leave your desk.
- Never share User ID information or tell anyone your user ID information and password.
- Retainable fingerprints are checked daily through the FBI Rap Back process for new arrests
- If you print anything out of UCJIS, destroy (shred or burn) the document when you are finished.

#### Manuals

- Manuals are located on the TAC website, click on MANUALS.
- Open up the manual you need, hit Ctrl F and a search window will appear, type in the word or phrase you are looking for.
- The Operation Manuals tell you how to enter information and what the field acronyms mean.
- The NCIC Code Manuals gives you the codes to enter into the specific fields.
- The NCIC TOUs (Tech, Operations Updates) have updated information on codes and fields for NCIC Entry. The TOUs are located on the TAC home page under MANUALS.

#### NCIC Entries

- Entries must be accurate, timely, and complete.
- "Pack" the entry with all available information - case files, every file in UCJIS you have access to.

#### Courts

- Entering Jail Release Agreement and Protective Order information timely and accurately is crucial.
- When the Judge makes a decision on a case, enter it into CORIS/UCJIS as soon as possible.
- If the Court does not expire JRA and POs timely, the court may be held liable.
- "Pack" a warrant with all available information - case files, every file in UCJIS you have access to.

#### Who to call first

- Your TAC/Alt TAC is the first person you call if you have a problem or need your password reset.
- If your TAC/Alt TAC is not available, call the BCI CIC Help desk: 801-965-4446
- You can also call your agency's BCI Field Services Rep. Click on "BCI Regions" on the TAC website home page to find the name and phone number of your Rep.

#### Miscellaneous

- Passwords expire 90 days from the last time it was set up. If you are on vacation when your password expires, change your password before you leave, type CPW in the transaction code field in UCJIS.
