1 INTRODUCTION

1.1 DEFINITION

A part is defined as any serially-numbered component from a vehicle or boat, and ownership documentation for a vehicle or boat.

1.2 CRITERIA FOR ENTRY

- A stolen vehicle/boat part may be entered if a theft report has been made. The entering agency must maintain the entry in an up-to-date status. The agency holding the theft report should enter the record. An agency in the state of registry may enter a record for a vehicle/boat part stolen in another state only after an inquiry, conducted after a reasonable period of time, discloses no record has been entered in the NCIC System by the agency holding the theft report. In this instance, the agency in the state of registry must enter the identity of the agency holding the theft report in the Miscellaneous (MIS) Field.
- A stolen vehicle identification number (VIN) plate, certificate of origin/certificate of title (blank or associated with a vehicle), or a serially-numbered backhoe, hay baler, engine, transmission, battery, carburetor, door, bumper, hubcap, etc., may be entered in the Vehicle/Boat Part File as stolen if a theft report is on file. AM/FM/CB radios, tape players, and other entertainment devices should not be entered in the Vehicle/Boat Part File but may be entered in the Article File.
- Agencies must have a theft report (electronic or hard copy) on file to support a vehicle/boat part entry. All NCIC entries should be made only by the agency holding the theft report and having primary jurisdiction over the place of actual theft. An exception to this occurs when a criminal justice agency or regional dispatch center acts as holder of a record for another agency which has no telecommunications equipment. Only when there is a written agreement between the two agencies which delineates the legal responsibility for the record can the agency holding the record place its own Originating Agency Identifier (ORI) in the ORI Field when the entry is made. Additional information concerning these responsibilities can be found in the Introduction chapter of this manual.
- In addition, data of investigative interest pertaining to stolen vehicle/boat parts transported into the United States may be entered by an agency having sufficient documentation to be responsible for the record. Vehicle parts may include blank, stolen, or counterfeit documents relating to the registration of the vehicle abroad or subsequent to its valid titling in the United States, as well as license plates issued on the basis of fraudulent proof of ownership.

1.3 MESSAGE KEY (MKE) CODES

Message	MKE	Translation

Clear	CP	CLEARED STOLEN PART

If it is desired that a stolen vehicle/boat part be held for latent fingerprint examination, the caution indicator -P should be entered as part of the MKE, for example, EP-P which translates as STOLEN PART - HOLD FOR LATENTS.

1.4 RECORD RETENTION PERIOD

Stolen Vehicle/Boat Part File records which contain a SER or OAN will remain on file for the balance of the year entered plus 4 years. Following this retention period, the records in the Vehicle/Boat Part File are retired. For example, a Vehicle/Boat Part File record entered in 1996 would be retired 12/31/2000.

1.5 AUTOMATIC RETIREMENT

Ten days after a vehicle/boat part record is located, it is retired. The ORI of the record will be notified that the record has been located by a \$.L. administrative message. Additional information concerning the \$.P. administrative message can be found in the Introduction chapter of this manual.

1.6 VALIDATION

For validation policy and procedures, refer to the Validation section in the Introduction chapter of this manual.

The VLN Field will be returned when the requester of the record is the entering agency, the CJIS Systems Agency (CSA) of the entering agency, the FBI, and in the \$.C. Request for Validation Notification and fixed format validation files. For all other responses, the Name of Validator (VLN) Field will be suppressed.

1.8 CRITERIA FOR REJECTING DUPLICATE RECORDS

- If the SER, BRA, CAT, and ORI Fields or the OAN, BRA, CAT, OCA, and ORI Fields of a stolen vehicle/boat are the same as those field codes of a part record already on file, the second record entry will be rejected with the message REJECT - ON FILE as found in the Introduction chapter of this manual.
- Whenever the message REJECT - ON FILE is sent, the record on file will also be transmitted.
- A duplicate record will be accepted if the ORI in the second message is different. In this case, the first entry will be furnished as a response to the second entry.

1.9 AUTOMATIC NOTIFICATION OF ENTRY

When an agency enters, clears, cancels, modifies, or locates, or the NCIC System purges a stolen vehicle/boat part record, the NCIC System will automatically notify the NICB through a \$.8. NICB Vehicle/Boat Notification message. Additional information on the \$.8. administrative messages can be found in the Introduction chapter of this manual.

1.10 IMAGE CAPABILITY

The Image File chapter of this manual contains information regarding entry, modification, cancellation, and inquiry of images in the NCIC System.

1.11 INVESTIGATIVE INTEREST

The Other Transactions chapter of this manual contains information regarding investigative interest supplemental records in the NCIC System.

2.3 MANDATORY FIELDS FOR ENTRY

Stolen vehicle/boat part entries require the following fields: HDR, MKE, ORI, BRA, CAT, DOT, OCA, a brief description of the stolen part in the MIS Field, and at least one of the following numeric identifiers: SER or OAN.

2.4 ADDITIONAL GUIDELINES FOR ENTRY

- The agency entering the record must account for all fields in the Vehicle/Boat Part File record format. All available data should be entered when the original entry is made. If there are data known that do not fit into a specific data field, then the MIS Field should be used. The MIS Field should only be used for information that cannot be placed in another data field. Missing data obtained at a later time should be promptly added through the use of a modify message (MKE/MP).
- Serialized truck-mounted campers (including shell type) should be entered in the Vehicle/Boat Part File. In the NCIC System the mounted camper should be entered as a part (EP) with the same OCA as that in the Vehicle File truck record. Unmounted serialized campers should be entered as a base part (EP) record. When a truck-mounted camper is not serialized, only a record for the truck should be entered in the Vehicle File with data in the MIS Field that describe the camper and state that it was mounted on the truck at the time of theft.
- For training and administrative purposes, agencies may enter test records into the NCIC System using the header TN01. The test records will not generate any notifications nor will batch processing be performed in the test system.
- When a stolen vehicle record is entered into the NCIC System, a vehicle/boat part record should not be entered when the part serial number has the same last eight characters as the VIN. When a stolen vehicle is partially located, users are encouraged to enter separate stolen part records for the unrecovered parts. In instances when a stolen vehicle part serial number does not have the same last eight characters as the VIN of the stolen vehicle, separate entries can be made into the Vehicle/Boat Part File.

2.5 MESSAGE FIELD CODE EDITS FOR ENTRY

2.5.1 DESCRIPTORS

Entry instructions and valid codes for BRA; CAT; and EPD can be found in Vehicle Data Codes, *NCIC Code Manual*.

Codes for entering the BRA for boat parts can be found in Boat Data Codes, *NCIC Code Manual*.

2.5.2 SERIAL NUMBER (SER)

When a stolen vehicle/boat part is entered, the serial number of the part must be entered in the SER Field. If an entry is for a stolen certificate of title, the title number should be entered in the SER Field. If the part is a nonmotorized forklift, the serial number should be entered in the SER Field. The vehicle identification number should be entered in the SER Field when the stolen part is a VIN plate. If the CAT is OB, then the SER is mandatory.

2.5.3 BRAND NAME (BRA)

- Valid BRA codes for vehicle/boat parts are listed in Vehicle Data Codes, *NCIC Code Manual*. Valid BRA codes for boat parts are listed in Boat Data Code, *NCIC Code Manual*. If the brand name for a part is not listed, the part may be entered using the generic code PART, listing the true manufacturer's name in the MIS Field.

- The BRA codes ENGN (engine) and TRMN (transmission) should be used for entry of stolen engines and transmissions manufactured by companies other than vehicle manufacturers. When the codes ENGN and TRMN are used in part records, the complete brand name must be entered in the MIS Field.
- For entry of a vehicle/boat part record for a stolen certificate of origin (CTO) or certificate of title (CTT), the BRA code for the manufacturer of the vehicle which is identified on the certificate should be used. For entry of a stolen blank CTO or CTT with a preassigned serial number, the BRA code CERF should be used.
- For entry of a stolen VIN plate, engine, or transmission, the BRA code for the make of the vehicle from which the part was stolen, e.g., FORD, CHEV, PLYM, etc., should be used. The same is true for any part entry for construction and/or farm and garden equipment such as a bucket/scoop or harrow. These should be entered using the BRA code for manufacturer of the equipment from which the part was stolen, e.g., DEER or MASS.

2.5.4 CATEGORY (CAT)

A valid two-character category code must be entered in the CAT Field of a stolen vehicle/boat part entry. Valid codes can be found in Vehicle Data Codes, *NCIC Code Manual*.

2.5.5 MISCELLANEOUS (MIS)

If a stolen vehicle/boat part entry contains either the code PART, ENGN, or TRMN in the BRA Field, the manufacturer's complete name must be entered in the MIS Field. A brief description of the part must also appear in the MIS Field as shown in the examples below:

- CAR RECOVERED VIN PLATE MISSING
- ONLY VIN PLATE STOLEN
- POWERGLIDE AUTOMATIC MISSING
- CERTIFICATE OF TITLE STOLEN

2.5.6 OWNER-APPLIED NUMBER (OAN)

The OAN Field is a 20-character searchable field. If the record entry also contains a SER, it cannot be the same as the OAN.

Another use of the OAN Field occurs when the stolen vehicle/boat part has a unique identification number which has been assigned in connection with a theft prevention program. In such a case, the OAN may be entered as the only numeric identifier or in addition to a SER.

2.5.7 ENGINE POWER OR DISPLACEMENT (EPD)

The EPD Field may only be used for part entries when the CAT Field code is EN (engine) or OB (outboard motor). If the CAT Field is OB, then the EPD is mandatory. The EPD Field is used to describe the size of the engine or motor, e.g., 750C for 750 cubic centimeters. Other units of measure are cubic inches -I, liters -L, horsepower -H, and pounds of thrust -P.

When the engine power or displacement contains a fraction or decimal, the whole number should be placed in the EPD Field, and the whole number plus the fraction or decimal should be placed in the MIS Field.

2.5.8 ORIGINATING AGENCY CASE NUMBER (OCA)

The entering agency should ensure the OCA is a unique number assigned to the case within the agency. For NCIC records not related to an investigative case, the OCA Field must still be unique (e.g., state system-assigned number, filing system number, state identification number).

2.5.9 VEHICLE YEAR (VYR)

The VYR must represent the production (model) year during which the vehicle/boat part was manufactured. If the year of manufacture is unknown, the entering agency should enter UNKN. If the CAT is OB, then the VYR Field is mandatory.

2.5.10 IMAGE DATA (IMN AND IMT)

The Image NCIC Number (IMN) must begin with an I and the Image Type (IMT) must be V. If the IMT is not V, the message will be rejected as a field error. The NCIC System will verify the generic image is an active record in the System by inquiring with the IMN. If the image is not found or the image is not stored as a generic type, the message will be rejected.

2.5.11 LINKAGE DATA (LKI and LKA)

The Linkage ORI and OCA Fields are provided as separate fields to associate incidents that are handled by multiple departments. An agency entering a record which shares the same incident of a record entered by a different ORI and/or OCA can link the records by entering the associated ORI and OCA in the linkage fields (LKI and LKA). The NCIC System will automatically link records entered within 30 days of the original entry that contain the same ORI and OCA. An ORI may use the LKI and LKA Fields to link related records that contain the same ORI and OCA entered more than 30 days after the original record entry. The message will be rejected if the first seven characters of the LKA are the same as the first seven characters of the LKI.

2.5.12 NOTIFY ORIGINATING AGENCY (NOA)

When the ORI believes that notification each time its record is hit will provide investigative leads, regardless of whether the location of the vehicle/boat part is known, Y should be entered into the NOA Field. If the NOA is left blank, the field will default to N.

The NOA Field will be returned in record responses when the inquiring agency ORI matches the entering agency ORI and in unsolicited notifications (\$. messages) to the ORI of record.

3 MODIFICATION

3.1 WHEN TO USE A MODIFICATION MESSAGE

Modification of a record is restricted to the agency that entered the record. A modification message is used to add, delete, or change data in an active vehicle/boat part record. If a vehicle/boat part record has been located (MKE/LOCATED PART) or retired, it cannot be modified and, therefore, must be reentered. For online validation, a modification message is also used to validate a record.

3.2 EXAMPLE OF A MODIFICATION MESSAGE

The modification example contains header (1N01HEADER), message key (MP), Originating Agency Identifier (MD1012600), two record identifiers (NIC/V000032699 and OCA/A222), the fields being modified, and the data being changed (BRA/HON, EPD/750C).

3.4 IDENTIFICATION OF A RECORD TO BE MODIFIED

The modification transaction must contain two record identifiers. For a stolen vehicle/boat part record, the first identifier must be NIC or SER. The second identifier must always be the OCA. All fields, other than HDR, MKE, or ORI must be preceded by the proper MFC and a slash (/).

3.5 ADDITIONAL GUIDELINES FOR MODIFICATION**3.5.1 NAME OF VALIDATOR (VLN)**

For NCIC validation, a name of validator may be added to the Name of Validator (VLN) Field of a vehicle/boat part record to indicate that the record has been validated. When data are entered into the VLN Field, the NCIC System stores the current date in the Date of Last Validation Field of the record. If the user attempts to delete or modify the VLN Field to all blanks, the message will be rejected. The acknowledgment for the modify message containing VLN Field data will indicate the record has been validated. Each CSA can determine the specific data to be included in the VLN Field for the validation of the record.

For example:

The modification example to validate a record contains header (1N01HEADER), message key (MP), Originating Agency Identifier (MD1012600), two record identifiers (NIC/V126431001 and OCA/2501), and name of validator (VLN/JONES, DAVID E).

4 CANCELLATION**4.1 WHEN TO USE A CANCELLATION MESSAGE**

Cancellation of a record is restricted to the agency that entered the record. A cancellation message is used when the entering agency determines that the record is invalid; for example, it is determined that a record resulted from a fictitious or false theft report.

4.2 EXAMPLE OF A CANCELLATION MESSAGE

The cancellation example contains header (1N01HEADER), message key (XP), Originating Agency Identifier (MD1012600), two record identifiers (NIC/V000032699 and OCA/A222), date of cancellation (19991205), and reason for property record removal (NOT STOLEN).

4.4 IDENTIFICATION OF A RECORD TO BE CANCELED

The cancellation transaction must contain two record identifiers. For a stolen vehicle/boat part record, the first identifier must be NIC or SER. The second identifier must always be the OCA. Each identifier must be preceded by the proper MFC and a slash (/). DOC must be the current date or the current date minus one.

4.5 ADDITIONAL GUIDELINES FOR CANCELLATION

When a record is canceled, the user is expected to enter the reason for property record removal (RPP). The RPP Field is entered directly after the DOC Field. For a cancellation, the RPP value will be either ADMIN CLOSING, CASE DROPPED or NOT STOLEN.

5 INQUIRY

5.1 EXAMPLE OF AN INQUIRY WITH NEGATIVE AND POSITIVE RESPONSES

In a stolen vehicle/boat part inquiry, the complete stolen vehicle/boat part serial number and owner-applied number value must be entered as a VIN.

For example:

```

5.2 MESSAGE FIELD CODES FOR INQUIRY

FIELD NAME	REQUIREMENTS	MESSAGE FIELD CODE	FIELD LENGTH	DATA TYPE
HEADER	MANDATORY	HDR	9-19	ALPHABETIC, NUMERIC, SPECIAL CHARACTERS
MESSAGE KEY	MANDATORY	MKE	2-2	ALPHABETIC
ORIGINATING AGENCY IDENTIFIER	MANDATORY	ORI	9-9	ALPHABETIC, NUMERIC

FIELD NAME	REQUIREMENTS	MESSAGE FIELD CODE	FIELD LENGTH	DATA TYPE

NCIC NUMBER	CONDITIONAL	NIC	10-10	ALPHABETIC, NUMERIC
IMAGE INDICATOR	OPTIONAL	IND	1-1	ALPHABETIC
RELATED SEARCH HIT	OPTIONAL	RSH	1-1	ALPHABETIC

* The value of MFCs SER or OAN must be represented with the MFC VIN.

5.3 REQUIREMENTS FOR INQUIRY

Inquiries can be made using the NIC or VIN Fields. The VIN Field contains the OAN or SER information. An inquiry of this type will search the VIN, SER, and OAN Fields of all Vehicle/Boat Part File records and the VIN Field of all person records. Additional information on inquiry can be found in the Vehicle File chapter.

5.4 ADDITIONAL GUIDELINES FOR INQUIRY

5.4.1 IMAGE INDICATOR (IND)

Inquiries submitted in an NCIC format may contain an Image Indicator (IND) to specify whether an image should be returned if available. If the image indicator is Y, an image related to each primary hit response, if available, will be returned (i.e., one identifying image for a vehicle/boat part record, one mugshot for a person record). If IND is not entered, the System will default to N.

5.4.2 RELATED SEARCH HIT (RSH)

Inquiries may also contain a RSH Field. If the RSH is Y, secondary hit responses will be returned for all linked records. The NCIC System links records when:

- 1) ORI/OCA matches the primary hit response and the dates of entry for those records are within 30 days of each other, or
- 2) the LKI/LKA are the same as ORI/OCA contained in the primary hit response.

If RSH is not entered, the field will default to N.

For example:

```
1N01HEADER.DCFBIWA11.NIC/V490005638.RSH/Y
```

The following would be returned after the primary hit response based on the ORI/OCA of the two records being the same:

```

TO OBTAIN ADDITIONAL SECONDARY HITS, INQUIRE ON FBI, SOC,

RECORDS, USE THE ONE CRIME INQUIRY (QI) TRANSACTION.

5.5 BATCH INQUIRY (QVB)

The NCIC batch inquiry allows users to create a file of individual QV/ZV inquiries in one message. Each inquiry is delimited by a sequence number (SEQ) at the beginning of the inquiry and an "&" as a separator. The SEQ is three numerics and is used to match the responses (hit or no hit) to the specific inquiry from which they were generated. Prior to each response SEQUENCE NUMBER: <SEQ> will be returned to identify those responses that follow as coming from the inquiry with that sequence number. Additional information concerning batch inquiry can be found in the Vehicle File chapter.

5.6 PROCEDURES FOR HANDLING A HIT

- An NCIC hit may not be probable cause to arrest. A hit confirmed with the ORI may be adequate grounds to recover a vehicle/boat part.
- When an agency receives a record in response to an NCIC System inquiry, and the whereabouts of the stolen vehicle/boat part inquired upon is known and the vehicle/boat part inquired upon appears to be identical with one or more of the records, the agency that can seize the stolen vehicle/boat part must contact the ORI of each record(s) possibly identical with the vehicle/boat part in question to confirm the hit(s) prior to seizing the vehicle/boat part.
- When an agency receives a record in response to an NCIC System inquiry, and the whereabouts of the stolen vehicle/boat part inquired upon is not known, the hit should not be confirmed.
- "To confirm the hit" means to verify that the theft report is still outstanding; to verify that the vehicle/boat part inquired upon is identical to the vehicle/boat part described in the record; and to obtain information concerning the return of the vehicle/boat part to the rightful owner.

- This system is based on two levels of priority: urgent and routine, with a different response time governing each level. Hit confirmation procedures are detailed in the Introduction chapter of this manual.
- When an agency receives a record response to an NCIC System query containing investigative interest information, the inquiring agency is not required to notify the investigative interest agency(s). If the investigative interest agency requests notification of all hits, this agency should place a "Y" in the Notify Investigative Agency (NIA) Field. Refer to the Other Transactions chapter of this manual for additional information on investigative interest supplemental records.

5.7 CANADIAN VEHICLE INDEX INFORMATION

- The NCIC System maintains an interface with the Canadian Police Information Centre (CPIC) that allows searchable identifiers in CPIC records to be transmitted to the NCIC System for storage and access, creating the Canadian Vehicle Index (CVI). The CVI contains stolen boat, part, vehicle, and license plate records, including U.S. registered vehicles and boats stolen in Canada. Based on the CVI response, the inquiring agency should perform an Nlets transaction to obtain current record information in CPIC, then perform any required hit confirmation. Canadian agency names, addresses, and telephone numbers may be obtained through a QO inquiry.
- All inquiries that search the Boat File, Vehicle File and Vehicle/Boat Part File may generate responses from the CVI. When a U.S. user queries the NCIC System and the query hits on a CPIC record, the user will receive the following message as a hit response:

Positive Response:

YOUR TRANSACTION IS A POSSIBLE MATCH WITH AN INDEX RECORD FOR A
STOLEN PART IN CANADA
WITH THE FOLLOWING IDENTIFIERS: ORI/MB1012600
SER/12345678.
ADDITIONAL INFORMATION MAY BE OBTAINED VIA NLETS USING A VQ OR CBQ
TRANSACTION.

6 LOCATE

6.1 WHEN TO USE A LOCATE MESSAGE

Any agency, except the agency that entered the record, that recovers a vehicle/boat part which is indexed in the NCIC System must place a locate message on the active vehicle/boat part record(s). When an agency receives a record or multiple records in response to an inquiry, the agency that can seize the stolen vehicle/boat part must contact the ORI of each record possibly identical with the vehicle/boat part in question to confirm the hit.

Following confirmation with the originating agency, a locate message must be transmitted for each record on file for the vehicle/boat part.

The MKE LP should be used for locating a stolen part record.

Once a stolen part record has had a locate placed on it, it cannot be modified.

6.2 EXAMPLE OF A LOCATE MESSAGE

The locate example contains header (1N01HEADER), message key (LP), originating agency identifier (WA1230000), two record identifiers (NIC/V000032699 and OCA/2325), date of recovery (19991205), recovering agency case number (5865).

```
1N01HEADER.LP.WA1230000.NIC/V000032699.OCA/2325.19991205.5865
```

Acknowledgment:

```
1L01HEADER
WA1230000
LOCATE NIC/V000032699
```

When a locate message is transmitted for a Vehicle/Boat Part File record, the message key translation changes as follows, and the date of recovery, recovering agency ORI, and recovering agency OCA are added to the record.

ORIGINAL TRANSLATION	TRANSLATION AFTER LOCATE
STOLEN PART	LOCATED PART
STOLEN PART - HOLD FOR LATENTS	LOCATED PART - HOLD FOR LATENTS

Benefits and effectiveness data may be entered but will not be stored or retrievable outside of transaction log data.

6.4 IDENTIFICATION OF A RECORD TO RECEIVE LOCATE

The locate transaction must contain two record identifiers. For a stolen vehicle/boat part record, the first identifier must be NIC or SER. The second identifier must always be the OCA. Each identifier must be preceded by the proper MFC and a slash (/). The OCA used as an identifier will be that of the agency that entered the record as shown in the record received from the NCIC System in reply to the apprehending/locating agency's inquiry. The date of recovery and recovering agency case number must be entered, in that order, and are not preceded by the MFC.

6.5 LOCATE PROCEDURES

- The date of recovery cannot be prior to the date of theft.
- Ten days after a record is located, it is retired, and the entering agency is notified with a \$.P. administrative message.
- The FBI's CJIS Division permits the NICB to locate an NCIC Vehicle/Boat Part File record (MKE/LOCATED PART) when NICB receives information concerning the recovery of a stolen vehicle/boat part and an inquiry reveals that the NCIC record is in active status (MKE/STOLEN PART).
- There are no locate procedures for CVI records.

6.6 AUTOMATIC NOTIFICATION OF LOCATE

When an agency places a locate against another agency's record, the NCIC System will automatically notify the entering agency through a \$.L. administrative message. Additional information concerning the \$.L. administrative message can be found in the Introduction chapter of this manual.

7 CLEAR

7.1 WHEN TO USE A CLEAR MESSAGE

Clearance of a record is restricted to the agency that entered the record. A clear message is transmitted:

- When the agency recovering the vehicle/boat part is the agency that entered the record.
- When the agency that entered the record is officially advised that the vehicle/boat part has been recovered by another agency.

7.2 EXAMPLE OF A CLEAR MESSAGE

The clear example contains: header (1N01HEADER), message key (CP), Originating Agency Identifier (MD1012600), two record identifiers (NIC/V000032699 and OCA/A222), date of clear (19991105), the recovering agency identifier (WA1230000), the recovering agency case number (5865).

7.4 IDENTIFICATION OF A RECORD TO BE CLEARED

The clear transaction must contain two record identifiers. For a stolen vehicle/boat part record, the first identifier must be NIC or SER. The second identifier must always be the OCA. Each identifier must be preceded by the proper MFC and a slash (/).

7.5 CLEAR PROCEDURES

There are two circumstances that require unique record formats to clear a Vehicle/Boat Part File record.

- If the agency that entered the record recovers the vehicle/boat part, only the DCL (which cannot be prior to the DOT) must be entered following the two record identifiers.
- If the Vehicle/Boat Part File record is located by an agency other than the entering agency and:
 - The record being cleared is in a located status (MKE/LOCATED PART); only the DCL would be entered following the two record identifiers.
 - The record being cleared is in an active status (MKE/STOLEN PART), the date of clear followed by the recovering agency's identifier and the recovering agency's case number in this order without field codes would be entered after the two record identifiers.
